PROFILE

I am Kyaw Zin Thet, an enthusiastic and motivated web developer with a strong passion for technology and a commitment to continuous learning. With a comprehensive foundation in both front-end and back-end development, I am dedicated to creating dynamic, efficient, and user friendly web applications that meet the evolving needs of users and businesses alike. With knowledge of SDLC, Git, and testing, I bring strong problem-solving skills, attention to detail, and a keen ability for analytical and logical thinking to every project.

PROJECTS

Wildlife Park Database Management

- Designed a MySQL-based relational database for managing animal and keeper records, with a visually appealing interface built using Java EE and MySQL database.

Food Box Website

- Created a user-friendly website for food box delivery, utilizing HTML, CSS, and Bootstrap for design and layout.

Gym Website

- Created a user-friendly gym website with optimized content layout, using HTML, CSS, Bootstrap, and jQuery.

IT Project Management Collaboration

- Led a team using industry-standard methodologies for project planning and execution, achieving project goals and delivering high-quality results through effective collaboration.

Real Estate Management System

- Collaborated on designing and implementing a comprehensive Real Estate Management System. Developed and maintained multiple web applications with strong functionality and responsiveness. Utilized JavaScript, React, and Redux for dynamic, user-focused features, and applied TailwindCSS for consistent, visually appealing interfaces.
